Network Solutions will charge (you will not receive a bill from netINS for the domain name itself, this will come from Network Solutions, Inc.) a fee of \$50 per year for a domain name registered in the ".com", ".org", or ".net" top level domains. The fee for the first two years is due within 30 days of the registration of the domain name. For more information about Network Solutions visit <http://www.netsol.com/>. Please contact netINS if you have questions about domain names or to see if a domain name that you are considering applying for is already taken.

DNS:

Do you plan on having netINS provide DNS (domain name service) for your domain? (an example of this is if you have a proxy server, mail server, or web server that you will be using with a netINS DSL Static IP)

Yes: ____ No: ____

If the above answer is yes please read the following.

netINS will handle forward and reverse DNS for one domain per DSL connection. The cost of the initial DNS entry for your domain will be free. It is important that you have a clear picture of what DNS you will need to start because any modifications to the original request will be charged for at the established rate. You won't know what your IP addresses will be until after we have notified you. Included with the notification of the IP

addresses that you have been assigned will be an access code to use in a web site that you will use to request DNS. (The URL of that website will also be included.)

You will not be charged for your first DNS entry. If you need to make changes in the future you will be billed each time you need to make a change.

Service is invoiced monthly in advance and may be canceled in writing with 60 days notice with no penalty.

NetINS reserves the right to change the rates by notifying you 60 days in advance of the effective date of the change.
